**REASONS FOR ALLOWANCE**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Epstein on November 10, 2003.

The application has been amended as follows:

A) Cancel claims 1-7, 18 and 19 without prejudice. Applicant may file a divisional application in the future based on claims 1-7, 18 and 19.

2. The following is an examiner's statement of reasons for allowance: the prior art discloses an apparatus for capturing energy from waves on a body of water, submerging an elongated member within the body of water in a vertical orientation with a closed end. However, the prior art fails to show, in combination with the invention that the each end of the elongated member experiences water pressures which vary as a function of overpassing surface waves and the submerged member

having a vertical length such that the amplitudes of water pressure variations at the lower end of the member are smaller than the amplitudes of simultaneous water pressure variations at the upper end of the member and resulting in varying water pressure differentials between the ends in which drive the member into vertical oscillations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
